SUMMARY

As a budding Web Developer, I'm an enthusiastic newcomer eager to make an impact in the world of web development. I possess foundational knowledge in HTML, CSS, JavaScript, React, and Node.js. I'm driven to design dynamic, responsive user interfaces and build robust back-end systems using Express.js and databases.

EXPERIENCE

Web Developer

IFSTATIC TECHNOLOGIES PVT.LTD.

September 2023 - February 2024, Online

- Developed, tested, and maintained high-quality web applications.
- Collaborated with the development team and received continuous guidance and feedback.
- Ensured punctual and high-quality task completion, contributing to a productive internship.
- Worked with various web technologies, participated in code reviews, and debugged applications.
- Consistently met deadlines and exceeded performance expectations, leading to positive feedback.

Full Stack Intern

ACMEGRADE

August 2023 - September 2023

- Assisted in coding and testing React.js components and features under the guidance of experienced developers.
- Worked with Git and GitHub for version control, ensuring collaborative code management.

System Design Intern

Aditya Birla Hindalco industries LTD.

July 2023 - August 2023, Renukoot

- Conducted regular testing and debugging to ensure the system's reliability and performance.
- Provided technical support and training to warehouse staff for the effective use of the Warehouse Management System.
- Worked closely with the IT team to integrate the Android system with the company's existing software infrastructure.
- Maintained documentation of system design, updates, and improvements.

PROJECTS

Tour website

tour-iota-lime.vercel.app/ • February 2024 - April 2024

- Meticulously crafted, developed, and upheld an inviting tour website using JavaScript and SCSS, fostering a user-friendly interface to showcase captivating tour packages.
- Implemented a robust data management system using JavaScript, ensuring efficient data handling and supercharged website performance.

MedAssist

November 2023 - April 2024

- MedAssist leverages the MERN stack, Python, and Flask to revolutionize medical service efficiency. The backend architecture, built with Node.js, Express.js, and MongoDB, ensures scalable and high-performance data handling. Flask is employed for Python-specific functions, enhancing data processing capabilities. The frontend, developed with React, HTML, and CSS, provides a responsive and user-friendly interface. MedAssist features patient management, appointment scheduling, and real-time data processing to improve healthcare accessibility and coordination. The integration of these technologies enhances operational efficiency and patient experience in healthcare services.

To-Do web App

github.com/akshat875/To-do-List • August 2023 - August 2023

- Utilized React.js to build a dynamic and responsive front-end for the To-Do web application, employing component-based architecture.
- Gained a deep understanding of React Hooks, including useState, useEffect, useContext, and useReducer, and effectively applied them to manage state, side effects, and context within the application

EDUCATION

Bachelor of Technology

Lucknow Institute Of technology • Lucknow, UP, IN • 2024 • 7.9

Major in Mathematics

Aditya Birla Intermediate College • Renukoot, UP, IN • 2020 • 80%

SKILLS

Languages: Java, Python, JavaScript, HTML, CSS

Technologies: ReactJS, MongoDB, NodeJS
